➤ Metadata**▼ Feature:** Calculate borrowing power

1

▼ Scenario: Calculate borrowing power

1 1 1

☒ Given I open the ANZ borrowing power calculator

9s 852ms

☒ When I fill the form with valid data

30s 24ms

status	single
dependants	0
purpose	home to live in
income	100000
otherIncome	10000

generated by
@cucumber-html-
reporter
(<https://www.npmjs.com/html-reporter>)

expenses	2000
currentHomeLoan	0
otherLoan	100
commitments	0
totalCredit	10000

Show Error +

☐ Then the borrowing estimate should be "547000"

< 1ms

▼ Feature: Reset borrowing calculator form

1

▼ Scenario: Clicking Start over clears the form

1 2 1

☒ Given I open the ANZ borrowing power calculator

3s 581ms

☒ When I fill the form with some data Show Error -

30s 123ms

```
locator.fill: Timeout 30000ms exceeded.  
Call log:  
[2m - waiting for locator('input[name="income"]')[22m  
at World.(anonymous) (E:\playwright\task\playwright-cucumber-task\features\step_d
```

☐ And I click the "Start over" button

< 1ms

☐ Then all input fields should be empty or reset
