at World.(anonymous) (E:\playwright\test\features\step\_definitions\common.steps.js)

- When I fill the form with valid data

< 1ms

dependants	0
purpose	Home to live in
income	100000
otherIncome	10000
expenses	2000
currentHomeLoan	0
otherLoan	100
commitments	0
totalCredit	10000

- Then the borrowing estimate should be displayed

< 1ms

- When I click the start over button

< 1ms

- Then the form should be reset

< 1ms

## Feature: Start Over Functionality

2m 5s 572ms 1

### Scenario:

Clicking Start over clears the form

2m 5s 572ms 3 1

Given I open the ANZ borrowing power calculator Show Error -

2m 5s 572ms

page.waitForSelector: Timeout 120000ms exceeded.

## Call log:

at World.(anonymous) (E:\playwright\test\features\step\_definitions\common.steps.js:11)

- When I fill the form with valid data

< 1ms

<b>dependants</b>	0
<b>purpose</b>	Home to live in
