**Test Environment:** Playwright + Node.js v20**Browser:** Chromium**Platform:** win32

## ▼ Feature: ANZ Borrowing Power Calculator

1m 33s 976ms

1

### ▼ Scenario:

Verify borrowing estimate and Start Over functionality

1m 33s 976ms

2

2

1

✖ Given I open the ANZ borrowing power calculator Show Error -

1m 33s 976ms

```
page.waitForSelector: Timeout 90000ms exceeded.
```

Call log:

```
⠼[2m- waiting for locator('iframe[src*="borrowingpower"]') to be visible⠼[22m
```

```
at World.(anonymous) (E:\playwright\test\features\step_definitions\common.steps.js:10:11)
```

- When I fill the form with valid data

< 1ms

dependants	0
purpose	Home to live in
income	100000
otherIncome	10000
expenses	2000
currentHomeLoan	0
otherLoan	100
commitments	0
totalCredit	10000

- Then the borrowing estimate should be displayed

< 1ms

⚡ When I click the start over button

< 1ms

```
Then(/^I click the start over button$/, function(callback) {
  // Write code here that turns the phrase above into concrete actions
  callback(null, 'pending');
});
```

⚡ Then the form should be reset

< 1ms

```
Then(/^the form should be reset$/, function(callback) {
  // Write code here that turns the phrase above into concrete actions
  callback(null, 'pending');
});
```

**▼ Feature:** Start Over Button1m 35s 332ms 1**▼ Scenario:**1m 35s 332ms 3 1

Clicking Start over clears the form

Given I open the ANZ borrowing power calculator Show Error -

1m 35s 332ms

```
page.waitForSelector: Timeout 90000ms exceeded.
```

Call log:

```
⠼[2m- waiting for locator('iframe[src*="borrowingpower"]') to be visible⠼[22m
```

```
at World.(anonymous) (E:\playwright\test\features\step_definitions\common.steps.j
```

When I fill the form with some data

&lt; 1ms

status	single
income	100000

And I click the "Start over" button

&lt; 1ms

Then all input fields should be empty or reset

&lt; 1ms
