## ▼ Feature: ANZ Borrowing Calculator

1

### ▼ Scenario: Borrowing estimate calculation

2 1

Given I open the ANZ borrowing power calculator

< 1ms

When I fill the form with valid data

generated by  
cucumber-html-  
reporter  
(<https://www.npmjs.com>  
html-reporter)

status	single
--------	--------

dependants	0
purpose	home to live in
income	100000
otherIncome	10000
expenses	2000
currentHomeLoan	0
otherLoan	100
commitments	0
totalCredit	10000

- Then the borrowing estimate should be "547000"

< 1ms
